Design your Slats

1. Select preferred substrate

Solid Timber

MDF

Plywood

2. Select preferred size

We advise that due to the natural nature of all timber we advise when detailing or installing timber slats that they are specified to have a 5-10mm negative space between each full length of timber. This is to allow for the natural expansion / contraction of the wood fibers. Avoiding twisting /warping of each slat.

St Catherine's College - Dandipoo Darbalano, Building @ UWA

Faith Community Church

Faith Community Church

Faith Community Church

3. Select preferred finish

- a) Solid timber range
- b) Plywood
- c) MDF

Hoop Pine

Western Red Cedar

Spotted Gum

Blackbutt

Walnut

Wenge

Oak

Available any solid colour from our standard colour chart
Alternatively chose from from any Pantone, RAL Paint colour Tubmans/Dulux colour range.

NOTE : The human eye cannot be relied upon to judge colour accuracy. We all see colour differently, even when we're looking at the same object! When it comes to colouring it's important to use a variety of methods to manage colour accuracy, especially when matching physical samples. Please request a physical sample before specifying

4. Design Considerations

Introducing PAA Slats, offering a seamless, continuous finish listing PM's concealed fixings. The solid slats and battens versatility and durability allow endless design possibility. PAA Acoustic Reduction (ACRE) linings in standard black or white may be integrated as insulation backing, achieving acoustic ratings of NRC up to 1.0. PAA Slats'
